

# 160884 - Report for the deletion of project versions

<b>Version</b>	27	<b>Type</b>	SAP Note
<b>Language</b>	English	<b>Master Language</b>	German
<b>Priority</b>	Correction with low priority	<b>Category</b>	Consulting
<b>Release Status</b>	Released for Customer	<b>Released On</b>	16.03.2022
<b>Component</b>	PS-VER ( Versions )		

Please find the original document at <https://launchpad.support.sap.com/#/notes/160884>

## Symptom

Project version cannot be deleted.  
A project version that has already been deleted can no longer be created under the same name.

## Other Terms

Version, project version, CN71, CN72, CJ 026, CJ 026, OK020, ITAB\_NETZ

## Reason and Prerequisites

Program error

Important: According to the version concept, status-dependent versions should actually not be deleted.

## Solution

\*\*\*\*\*!!!!!!

Only execute this report after consultation with Regional Support or Development Support !!!!!

\*\*\*\*\* Execute the program ZVERSDEL for the project versions with the specified version number in order to delete them.

Note that this program deletes all project versions with the specified version number.

Time-controlled, action-controlled and simulation versions for different projects, WBS elements, or networks are immediately and permanently deleted by ZVERSDEL.

The program can be executed in test mode, so it determines all objects of the project version without deleting them immediately.

If the program should terminate, you must first increase your buffer. If this still does not help, execute the program ZVERSDEL2.

If you have a Unicode system, use the program ZVERSDEL3

## Software Components

Software Component	Release
--------------------	---------

SAP_APPL	30F - 30F
SAP_APPL	31I - 31I
SAP_APPL	40A - 40B
